

# Weather Sensor

## Stand along monitoring sensor

Weathercom measures meteorological parameters such as wind speed & direction, rainfall, visibility, UV-radiation, light intensity, temperature, humidity, pressure, etc. Hyper-local meteorological parameters can be monitored in real-time which can help to take on-time decisions in case of any natural hazard.

## Technical Specifications

Description	Weathercom
Power consumption	5 Watt
Battery backup	12 hours
Dimensions	360 x 328 x 200 mm
Temperature	-20 °C to 60 °C
Humidity	0-95% RH
